# Hotel Bosmal Arjaan by Rotana reduced energy costs by 15%

Best.Energy South East Europe (SEE), in collaboration with the Rotana team, optimised consumption in the rooms, boilers and temperatures throughout Hotel Bosmal Arjaan.

## Client Requirements

Due to the increasing cost pressures resulting from rising energy prices, the hotel's management wanted to bring costs under control and increase its net profit without compromising guest comfort!

**15%**  
Savings

**2 Years**  
Return On Investment

## Our Solution

We optimised room consumption during periods of low occupancy. We also brought excessive hot water demands in the kitchen and hotel within realistic limits, thereby easing the strain on the boilers.

As the hotel has a lot of refrigeration units, from cold rooms to fridges, we increased their efficiency with CUES.

## The Results

- 15% reduction in the facility's electricity consumption
- Return on investment in up to 2 years
- Automated alerts - monitoring of heat pump operation
- Weekly and monthly reports - continuous monitoring
